

Donal the Púca

A stout man rounding out at a height of 3 feet delights in hijinks. Depending on his mood, he's a crass friend or an annoying pest— and quite literally. His powers allow him to shapeshift into a variety of creatures to serve his personal interests. You might not just be imagining that rat when interacting with him.

Quantum Faery (selecting talent within character creation)

For you, enemies and the landscape become mere playthings as you manipulate the quantum reality of the world around you. Analyze quantum fluctuations to predict your enemies' moves, and disrupt them by reconfiguring subatomic matter into obstacles and weapons. All energy and matter are at your disposal to wield.
